Kuzma Stogi S Tonearm

The Stogi S Tonearm

This is a unipivot design with a unique,

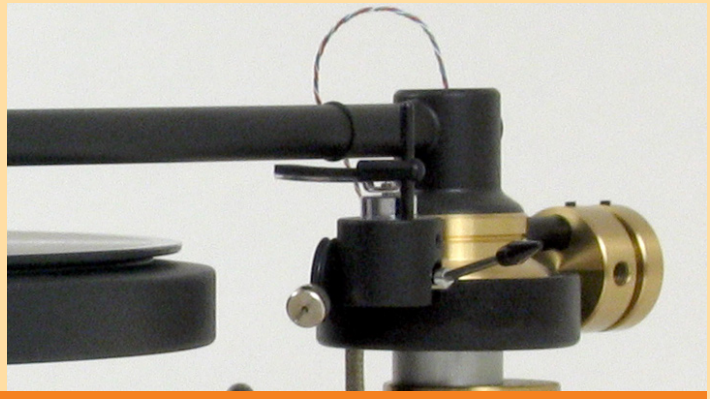
rigid headshell made from a solid aluminium block and a base of solid brass, which control all vibration and facilitate stability of the tonearm as a whole. All parts of the arm are machined from blocks of solid metal, in order to provide damping and minimise resonance. The polished pivot point is sited in an oil well, which provides extremely low friction and bearing vibration. The height is at record level for optimum tracking.

The silicone damping, controls resonance of the cartridge and also gives stability in azimuth direction.

Two counterweights allow easy adjustments of tracking force and azimuth. Fine azimuth adjustment is achieved by rotation of a horizontal screw in the counterweight, which does not affect other tonearm parameters and which makes adjustment very simple.

Wires are in one uninterrupted piece from headshell to RCA phono connectors.

By special order, wiring can also be fitted for balanced connection.



Technical Data:	
Effective length:	229 mm
Pivot to spindle distance:	212 mm
Effective mass:	11 grams
Height adjustment:	Yes
Bias adjustment:	Yes
Azimuth fine adjustment:	Yes
Fine azimuth fine adjustment:	Yes
Arm mount:	25 mm or collar
Mass:	600 gr
